palette unveiled.

Welcome to a world where artistry and nature intertwine, where beauty is captured in its purest form. Our latest catalogue showcases a breathtaking collection of 1200x2400mm big format tile that pay homage to the everlasting allure of marble, while drawing inspiration from the mesmerizing wonders of the natural world.

1200 ×
2400 mm

9 mm
thickness

Introducing our impressive large-format tile, measuring an expansive 1200x2400mm with a slimline thickness of 9mm. This tile is designed to redefine the aesthetics of any space with its grand dimensions, offering a seamless and elegant surface that exudes modernity and sophistication.

advantages of slabtile

1. SPACIOUSNESS

In the same way that light colors provide the feeling of greater size to any room, the size or size of the tiles also directly affects the perception of the size of a room.

If you intend to visually extend an environment, that is to say that gives the feeling of being larger than it is in reality, the most appropriate and recommended is to lean on large-scale porcelain tiles.

2. VARIETY OF USES

Large surfaces give way to a large number of innovative ideas regarding design, since they offer a large number of uses. It is possible to use porcelain tiles for the design of bathrooms, kitchens, countertops, work tables, among many other ideas, due to its size, consistency and high technical performance.

3. CONTINUITY EFFECT

The large extensions in the porcelain pieces allow coating the surfaces making use of a small number of pieces. This translates into a smaller number of groupings, which makes it possible to create a higher visual level of uniformity.

The reduction of the grouping of the pieces provokes a greater visual continuity that only large-format porcelain sheets can offer. In addition, as the pieces are of rectified joints, the separation between the sheets is extremely reduced. Despite this, we recommend that the filling between pieces be done with color or tone similar to the tile, giving the illusion that it is a single piece.

4. INSTALLATION TIME

Another advantage that we can highlight about this type of format, is the reduction of installation time. When the porcelain tile is larger, it requires a smaller number of sheets, which in turn facilitates its assembly and minimizes the time dedicated to it.

Years ago, it could be heard that large-format tiles were more complicated to place compared to traditional tiles. However, these problems were left in the past thanks to innovative installation methods that allow quick, easy and simple tiling.

5. SUITABLE FOR FACADES

The large-format porcelain stoneware can use great techniques when coating the facades, not only for its size, but for the benefits of strength and durability they provide.

6. LARGE FORMATS ARE TREND

Also, if you want to be up to date and follow the dictates of fashion, you should take note of the use of large porcelain formats. In them, you will find the answer to create spaces of great beauty and uniqueness.

With large-format tiles you can unify spaces and are easy to integrate with other types of porcelain stoneware such as hydraulic tiles that provide a more vintage touch, to design original and modern rooms.

7. BRUTALIST STYLE

If you are a fan of the Brutalist Style, large-format tiles are your great ally. The crude and primitive nature of the brutalist style, which frequently uses materials from the past, fits perfectly with the technical characteristics of large formats, as well as with its wide range of applications.

8. MORE HYGIENIC

And, last but not least: large-format tiles are more hygienic. You wonder why? With less together, there are fewer areas in which to store the dirt. Therefore, large-scale porcelain stoneware is in itself more hygienic, providing, at the same time, a faster and easier cleaning.
